WHEAT COLLECTION

**100% RECYCLED PLASTIC
& CHARITABLE CAUSE**

**All KreaFunk products from AW2022
and forth will be produced
from 100% recycled plastic!**

—
The care series will also benefit from this. Progressing it will be 65% recycled plastic and 35% wheat fibre. We are switching to a new Gabriel® fabric that is made from 99% recycled polyester.

KreaFunk version 2022 is not only one of the most stylish brands around, it's also one of the greenest in the entire tech industry.

Charitable cause

—
And hey! There's more. Through the care range, we support charitable causes that work to make the world a better place. We do this with two crowns per sold care product in 2021.

Supporting a charitable cause goes well with care products and our long-term goal of reducing the amount of plastic in everything we do.

ANATOLE

Solid Color Umbrella

01BRDX

» **SO COMPACT**
17,5 CM / Ø84 CM / <250 GR
When closed, an Anatole umbrella is just about the size of a mobile phone. Optimised for fitting in a pocket or a small handbag, thanks to its very light weight.

» **ECO FRIENDLY**
Made 100% from recycled fabric (rPET), it ticks all the boxes in terms of quality and it helps in reducing our environmental impact. Elegant finishings such as a wood handle and grosgrain hand straps.

» **STURDY**
The size resistance ratio of our umbrellas is unbeatable: reinforcements have been added to our 7 ribs with resistant and lightweight components (fiberglass and carbon mainly).

The idea to create Anatole originated in Bristol, UK, when David, who is the founder of the brand (and indeed half-British), was studying there. Anatole was born in January 2018 and has become the first brand specializing in quality micro-umbrellas. Much more than a collection of beautiful, colorful, durable and lightweight umbrellas: Anatole helps the world to stay stylish on rainy days! The head office is located in the center of Paris. The team's inspiration is fueled by the city, its people, its shops and its many designers. Each of the models is named after a place in Paris (Madeleine, Colette, Germain ...)

WE ARE AGENT

24Bottles is the Italian design brand born in 2013 to reduce the impact of disposable plastic bottles on the planet and our lives. 24Bottles believe that good design can change things for the better and help people improve their health and quality of life and look in an environmentally friendly way. Their focus is to combine form and function to offer uniquely lightweight bottles, coordinated accessories, and intelligent solutions. We aim to foster a more sustainable and comfortable lifestyle while keeping personal style in check.

« The idea of 24Bottles comes from the search for the most convenient and functional solution to meet the need to hydrate in a healthy, elegant and ecological way, day by day. The concept is to create useful and functional objects that make the world more pleasant and less polluted. »
Giovanni Randazzo and Matteo Melotti - Founders of 24Bottles
